

# Land Cover Types In Downtown Lexington

Determining percent of developed land using NLCD data

## NLCD Classification

- Developed, Open Space
- Developed, Low Intensity
- Developed, Medium Intensity
- Developed, High Intensity
- Deciduous Forest
- Mixed Forest
- Hay/Pasture

For this 4 square mile area of interest encompassing downtown Lexington, only 1.3 percent of the area, or .05 square miles, isn't developed. However, some developed areas classified as having open space still have heavy vegetation.
